

PRE-SEASON INSPECTIONS CHECKLIST

GRANULAR SPREADERS

Suggested checkpoints during a pre-season inspection include:

- Clean, inspect, and grease all electrical connections with dielectric grease.
- Grease bearings and lube chain if applicable.
- Check drive chain for proper tension.
- Check gearbox fluid level and condition, top off or change as necessary.
- Verify function of drive assembly.
- Verify function of spinner assembly.
- Verify all lighting works and momentary dump and light switches function.
- Verify vibrator functionality if applicable.
- Check hopper for any signs of stress or damage.
- Check tie down straps for any damage or fraying.
