

PRE-SEASON INSPECTIONS CHECKLIST

VSI GENESIS SPRAYER

Suggested checkpoints during a pre-season inspection include:

- Inspect cradle weldment and boom for cracks and loose hardware.
- Check the tank tie-downs to ensure the tank is secure.
- Clean, inspect, and grease all electrical connections with dielectric grease.
- Fill the tank a quarter full with brine and start the system. Inspect for leaks and test the functionality of the hand sprayer and boom.
